SUMMARY

Data Analyst looking to apply expertise in user behaviour analysis, experimentation, and product reporting to improve retention, drive growth, and support data-backed product decisions.

EXPERIENCE

Data Analyst · Mozambikes | Volunteer

Sep 2025 – Present

- Consolidated **15+ years** of financial, donation, revenue, and impact data from **6+** Excel and CSV files into one Power BI system, improving data accuracy and simplifying performance reporting.
- Built **4+** automated trackers with pivot tables to monitor collections, targets, and impact metrics for weekly reviews.
- Performed data modeling and transformation to build **5+ dashboards** with **12+ KPIs** covering growth trends, employee performance, funding activity, and impact outcomes.
- Designed dashboards for **external stakeholders** to support fundraising and donor discussions. Created user guides and delivered hands-on training to enable independent progress tracking.

BI & Reporting Analyst Intern · Innovative Technology Strategies

Aug 2025 – Sep 2025

- Collaborated with **cross-functional** teams to design pre- and post- program surveys with outcome-based KPIs, improving response and completion rates.
- Supported program operations by collecting participant demographic data, analysing **engagement metrics**, and mapping participant journeys from **onboarding** to completion.
- Reduced transcript processing time by **40%** by extracting YouTube transcripts and using Python to clean and preprocess raw text, enabling downstream analysis for program impact reporting.

PROJECTS

A/B Testing: Food Ordering Conversion Lift | Excel, Python, Power BI | [GitHub](#)

- Designed and executed a **14-day A/B test across 88K users** to evaluate the impact of a social-proof badge on purchase conversion and average order value.
- Identified a **+3.4% conversion lift**, translating to **₹925K in projected monthly revenue**, presented as a product recommendation for full rollout.

Subscription & Churn Analysis | Excel, Python, Power BI | [GitHub](#)

- Tracked subscription behaviour of **28K users over 2 years** and built a Power BI dashboard monitoring churn, MRR, and ARPU across retention cohorts.
- Spotted a **32% drop in paying users**, modelled a **\$270K+ revenue recovery opportunity**, and identified the exact user segments and lifecycle stages driving churn.

E-commerce Product Performance Analysis | Excel, SQL | [GitHub](#)

- Analysed **108K orders (\$28M revenue)** over 4 years to understand sales trends, product performance, and customer retention.
- Identified that **3 products generated 85% of revenue** and loyalty program adoption grew from **11% to 55%**, tracked through channel and refund dashboards.

TECHNICAL SKILLS

Analytics & BI: Power BI, Tableau, DAX, Power Query, Excel (Pivot Tables, Lookup Functions), A/B Testing, Cohort Analysis, KPI Design, Dashboard Design, Business Intelligence

Data & Languages: SQL, Python, ETL, Data Cleaning, Data Modeling, Data Validation

EDUCATION

RMK Engineering College

Bachelor of Engineering | *Electronics & Instrumentation Engineering* | CGPA: **8.9**
